CRESPO GONZÁLEZ, M^a ISABEL

Fisiopatología general. 2.^a edición 2022 CRESPO GONZÁLEZ, M^a ISABEL, 2022-06-01 La Fisiopatología estudia las disfunciones que se producen en el organismo y que le impiden alcanzar su correcto desarrollo. Este libro desarrolla los contenidos del módulo profesional de Fisiopatología general de los Ciclos Formativos de grado superior en Anatomía Patológica y Citodiagnóstico, Higiene Bucodental, y Laboratorio Clínico y Biomédico, perteneciente a la familia profesional de Sanidad. En esta nueva edición se han actualizado y ampliado los contenidos, adaptándolos a los constantes avances en investigación en salud. Las primeras unidades desbrozan la célula humana, situándola primero en su entorno filogenético, identificando sus orígenes e interrelaciones con otros organismos, especialmente virus y bacterias patógenas, cuyo conocimiento facilita, a su vez, el conocimiento celular y los avances terapéuticos. Desarrolla, por tanto, el espacio filogenético, los niveles abióticos y bióticos y su relación con los ecosistemas y el cambio climático. Profundiza en la histología y la conformación de sistemas y aparatos, de forma que, al comprender el funcionamiento, se comprenden también los aspectos disfuncionales. Se describe, a continuación, el proceso patológico general y los sistemas de defensa del organismo para acometer después las enfermedades infecciosas, con especial dedicación a la COVID-19, las enfermedades oncológicas, las respiratorias, las neurológicas, aquellas que están dentro del ámbito del aparato digestivo, las patologías genitourinarias y los trastornos hemodinámicos y vasculares, para finalizar con las enfermedades endocrinas, la alimentación y los trastornos relacionados. La autora, Isabel Crespo González, es licenciada en Ciencias Biológicas, especialista en Bioquímica y Biología Molecular, diplomada en Administración y Dirección de Servicios Sanitarios, máster en Administración y Dirección de Fundaciones y Entidades no Lucrativas, y máster en Alta Dirección de Servicios de Salud y Gestión Empresarial. Ha participado en el ámbito de la investigación biomédica como gestora, coordinadora, autora e investigadora.

Fisiología humana Dee Unglaub Silverthorn, 1982 -Enfoque en la resolución de problemas: una de las habilidades más valiosas que facilitará a los alumnos pensar de manera crítica y utilizar la información aprendida para resolver nuevos problemas. -Énfasis en la integración: para entender que el cuerpo humano funciona como un todo coordinado, no como sistemas y aparatos aislados. Utiliza el síndrome metabólico para ilustrar las relaciones entre la normalidad y una enfermedad integral que afecta a múltiples sistemas del organismo simultáneamente. -Integración de la fisiología general con la fisiología celular y molecular: eje de la mayor parte de la investigación actual en fisiología. -Presentación de la fisiología

como un campo dinámico: para comprender que muchos de los hechos que están aprendiendo son sólo las teorías actuales.

Atención sanitaria inicial en situaciones de emergencia GARCÍA PÉREZ, ESTER, 2017-03-01 Este libro desarrolla los contenidos del módulo profesional de Atención Sanitaria Inicial en Situaciones de Emergencia, del Ciclo Formativo de grado medio de Emergencias Sanitarias, perteneciente a la familia profesional de Sanidad. Para ello, se ha tenido en cuenta el RD 1397/2007, de 29 de octubre, y la Orden ESD/3391/2008, de 3 de noviembre, por los que se establecen el título y el currículo, respectivamente, del título de Técnico en Emergencias Sanitarias. Asimismo, se han considerado los currículos de dicho ciclo en cada comunidad autónoma del territorio español. La obra se organiza en 12 unidades, que desarrollan los siguientes temas: la asistencia sanitaria en emergencias; el sistema nervioso; el aparato cardiocirculatorio; el aparato respiratorio; la parada cardiaca; soporte vital básico en adultos; soporte vital básico en víctimas pediátricas; obstrucción y manejo de la vía aérea; soporte vital intermedio; atención a múltiples víctimas; clasificación de las víctimas: el triaje; situaciones especiales en emergencias. Es importante destacar que todas las unidades están diseñadas desde dos puntos de vista: el del docente, en cuanto a la forma, la estructura, las actividades y los recursos de cada unidad; y el de los profesionales de emergencias sanitarias. La combinación de ambos enfoques permite una enseñanza completa, útil y eficaz, tanto para el proceso de enseñanza-aprendizaje como para la futura vida profesional de los alumnos. Asimismo, cada unidad ofrece multitud de recursos para profesores y alumnos. Cuenta con gran número de esquemas, imágenes, tablas, actividades propuestas y cuadros aclaratorios o de información adicional, para ilustrar y poner en práctica los contenidos teóricos y ayudar a una mejor comprensión de estos. Además, el mapa conceptual al término de cada unidad muestra el recorrido en el proceso de enseñanza-aprendizaje. Por último, se incluyen actividades finales de comprobación, aplicación e investigación, con el objetivo de que los alumnos desarrollen distintas capacidades de estudio. Por ello, esta obra, fruto de la experiencia docente de su autora, es una útil herramienta para profesores y alumnos de este módulo.

Aplicaciones de investigación de operaciones en sistemas de salud en Colombia Villegas, Juan G., Gutiérrez, Elena Valentina, Barrera Ferro, David, Osorio Muriel, Andrés Felipe, Paredes Bayona, Juan Esteban, Bolívar Polanía, Carlos Andrés, Guerrero, William J., Leal Hernández, Deisy Paola, Ortiz López, Liceth Paola, Rivera Cadavid, Leonardo, Ceballos Acevedo, Tatiana María, Velásquez Restrepo, Paula Andrea, España Lopera, Juan Camilo V, Úsuga Manco, Olga Cecilia, Ramírez Sierra, Yuly Andrea, Lamos Díaz, Henry, Álvarez Tobón, Edwin Alonso, Ramírez Orrego, Marta Cecilia, Rodríguez Quintero, Alma Karina, Espejo-Díaz, Julián Alberto, López-Santana, Eduyn, Caicedo-Rolón, Álvaro

Junior,Jaén-Posada, Juan Sebastián,2020-11-11 Sin duda, ver los sistemas de salud desde la perspectiva de la investigación de operaciones impone nuevos retos que no son insalvables. Hay en los sistemas de salud desafíos y dilemas a los que quizás antes no nos veíamos enfrentados al trabajar en otras industrias o servicios. Desde dilemas éticos, causados por la naturaleza del servicio de salud como un derecho fundamental, bien sea porque en las decisiones que se modelan muchas veces están involucradas las vidas y el bienestar de los pacientes, o porque los objetivos de los sistemas de salud van más allá de la rentabilidad o la disminución de costos a los que estamos comúnmente acostumbrados (v. g., mejorar la cobertura o lograr equidad). Por otro lado, entender los sistemas de salud y las decisiones que en ellos se toman (para el tratamiento de los pacientes, para la planeación de las operaciones de los servicios o para la definición de políticas públicas) exige apropiarse de conocimientos que son ajenos a la formación tradicional en investigación de operaciones. Por fortuna, esto último exige la conformación de equipos multidisciplinarios, con personal asistencial (médicos, enfermeras, instrumentadores, terapeutas, etc.), con epidemiólogos, con funcionarios del Estado, con expertos en sistemas de información, calidad y acreditación en salud, entre otros. En estos equipos es también importante la investigación de operaciones, pues los complementa aportando una visión cuantitativa, analítica e ingenieril que algunas veces no tienen.

La enseñanza y el aprendizaje de la biología Fonseca Amaya, Guillermo,Moreno Durán, Carmen Helena,Rojas López, Darío Armando,Hernández González, Yesika Mayuly,Contreras Usaquén, Erika Yamile,Mesa Cabrera, Pamela,Bermúdez García, Rosa Gineth,2020-08-04 Este libro muestra el diseño y la implementación de tres propuestas didácticas que aportan a la comprensión de los efectos del consumo de Cannabis sativa en el sistema nervioso, en tres grupos de estudiantes de Educación Básica Secundaria, en Bogotá, para propiciar la toma de decisiones asertivas frente al consumo. En su desarrollo, se caracterizó el nivel de acercamiento al consumo de sustancias psicoactivas y las concepciones que tenían los estudiantes sobre los efectos del consumo de Cannabis sativa. Las propuestas didácticas se diseñaron y aplicaron desde el enfoque de enseñanza para la comprensión en dos instituciones y desde el modelo pedagógico social-cognitivo, articuladas a los PEI de cada una de las instituciones participantes. En el proyecto participaron, a través de la Investigación-acción, estudiantes de Educación Básica, profesores de las IED y docentes de la Universidad Distrital Francisco José de Caldas del proyecto curricular de Licenciatura en Biología. Esta investigación contribuyó a replantear la enseñanza de la biología a partir de una perspectiva contextual, que aporta a la solución de problemas sociales desde la formación de estudiantes con un pensamiento crítico, desarrollo de habilidades y actitudes científicas, necesarias para fomentar conductas de autocuidado frente al consumo de sustancias psicoactivas.

Diagnóstico y terapéutica a través de mapas conceptuales Vicente Blas Cerecedo Cortina,2024-02-06 La Dirección de Educación y Capacitación en Salud del Hospital General de México tiene el agrado de presentar el libro Diagnóstico y terapéutica a través de mapas conceptuales del Dr. y Maestro Vicente B. Cerecedo Cortina. Esta obra concentra la gran

experiencia del Dr. Cerecedo de una habilidad clínica fundamental que es la de diagnosticar, pues es éste el objetivo del médico clínico, visto como proceso del diagnóstico, el cual cursa por varias etapas que corresponden a las mismas del método científico, pero aplicadas a la atención de pacientes, base fundamental para todo estudiante que pretenda conocer de una forma novedosa y sencilla esta asignatura tan importante en la currícula de cualquier escuela de medicina. Dirigida fundamentalmente a los estudiantes de medicina, esta obra es también de obligada consulta y repaso permanente para internos, personal graduado y residente de cualquier especialidad médica, por constituir tema básico en la formación del profesional de la salud, cuyo conocimiento cabal es requisito de una actuación competente y un desempeño óptimo. Como corolario de esta presentación, y tomando las mismas palabras del Dr. Cerecedo, concluimos de la siguiente forma: Actualmente, la enseñanza de conocimiento se considera insuficiente, hay que adicionar el aprendizaje y la enseñanza de los procesos que inducen al razonamiento, es decir, debemos impulsar el 'aprender a pensar', y este legado nos enseña a pensar.

Aprender en el aula Beder Bocanegra Vilcamango, Beldad Fenco Periche, Diana Rosa Ynga Santisteban, Sandra Ydelsa Wyszowski Elías, Susan Fabiola Dejo Aguinaga, Yliana Gilma Fátima Alvarado Castillo, Yvonne de Fátima Sebastiani Elías, 2023-04-02 Una de las tareas educativas en estos tiempos, donde el cambio es una exigencia cada vez más diversa, es la respuesta académica del docente, que debe reflejarse en el afán de ofrecer ideas innovadoras para mejorar el aprendizaje respecto de sí mismo y en relación con los escolares. En este sendero complejo surgen algunas ideas que se presentan de modo sencillo en esta propuesta que comprende cuatro capítulos. Inicialmente, se presentan estrategias de enseñanza basadas en el material de trabajo de Frida Díaz Barriga y Gerardo Hernández Rojas. En este primer capítulo se parte del concepto de estrategias dentro de este enmarañado tejido conceptual para luego comprenderlas en su magnitud instrumental dentro del aula. En el segundo capítulo se ofrece una visión alternativa de la estrategia para evaluar bajo un enfoque socializador. Estos mecanismos caracterizan el papel del docente en plano estrictamente creativo e innovador para promover que el aprendizaje sea una experiencia didáctica dentro del aula. En el tercer capítulo se recogen algunas ideas para configurar las estrategias para producir textos sencillos siempre dentro del aula a modo de motivación. Estas tres posibilidades se acompañan de lecturas complementarias con la finalidad de determinar el contexto de cada estrategia y sus efectos en relación con las rutas de aprendizaje como un documento referencial para la tarea docente en el aula. Finalmente, el capítulo cuatro se presentan estrategias de redacción para fomentar el aprendizaje significativo.

Pathophysiology of Heart Disease Leonard S. Lilly, 2020-05-26 Enthusiastically acclaimed by medical students and faculty worldwide, this text is specifically designed to prepare students for their first encounters with patients with cardiovascular disease. Thoroughly revised by internationally recognized Harvard Medical School faculty and a team of select cardiology fellows and internal medicine residents, this seventh edition equips students with a clear, complete, and

clinically relevant understanding of cardiovascular pathophysiology, setting a strong foundation for patient diagnosis and management.

Necesitamos conocernos María Luisa López García, María del Carmen San Juan Garcés, 2002-09-02 Material de apoyo para el desarrollo del currículo del Área de Ciencias de la Naturaleza. Su enfoque integrado sobre el ser humano da paso a la interdisciplinariedad, y promueve un aprendizaje activo en el que se coordinan la teoría y la práctica, dando al alumnado la oportunidad de estudiarse a sí mismo. Consta de siete Bloques temáticos, estructurados en diversas Unidades de trabajo, a través de las cuales se refleja el desarrollo humano. Su flexibilidad permite una adaptación a los respectivos contextos socioculturales y tener en cuenta las necesidades educativas del alumnado.

Global Burden of Disease and Risk Factors Alan D. Lopez, 2006-04-02 Strategic health planning, the cornerstone of initiatives designed to achieve health improvement goals around the world, requires an understanding of the comparative burden of diseases and injuries, their corresponding risk factors and the likely effects of intervention options. The Global Burden of Disease framework, originally published in 1990, has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities. This publication sets out an updated assessment of the situation, with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data.
